3/4 of the crescendo is in this measure for some reason.  
Muse Sounds. Yay.

*mf*

Muse Sounds has WAY too much of a gap between mezzoforte and forte for flutes, more noticeable than the difference between *f* and *ffff*. This should not be true.

Muse Sounds also has too much of a gap between mezzopiano and mezzoforte in this instrument.

Really hard to tell what these notes are; I just copied and pasted from measures 11-18.

It's possible that there are some instruments missing from this part... but I just can't tell what notes they're playing.

Really hard to tell what these notes are; I just copied and pasted from measures 11-18... again.

I genuinely cannot hear the accents at all. Thanks, Muse Sounds!

Again, when there are a lot of instruments, it's really hard to tell what's playing what.  
Why is a pianissimo piccolo louder than a mezzopiano flute?

Why is mezzoforte so much louder than mezzopiano?

**accel.**  
♩ = 60

The speed of the tempo change isn't perfect, but I'm too lazy to fix it.

Really?

pizz.

Normally I'd just have forte on the top and piano on the bottom, but MuseScore 4 doesn't have the ability to do different dynamics within 1 instrument yet.

Muse Sounds makes it sound very staccato....

Guessing; can't hear the F after this measure

I'm not entirely sure the violin plays the entire time, but it definitely does in measures 108-109.
