3/4 of the crescendo is in this measure for some reason. Muse Sounds. Yay.

Muse Sounds has WAY too much of a gap between mezzoforte and forte for flutes, more noticeable than the difference between *f* and *ffff*. This should not be true.

Really hard to tell what these notes are; I just copied and pasted from measures 11-18.

It's possible that there are some instruments missing from this part... but I just can't tell what notes they're playing.

41 tell what notes they're playing.

Really hard to tell what these notes are; I just copied and pasted from measures 11-18... again.

I genuinely cannot hear the accents at all. Thanks, Muse Sounds!

I can barely hear it at mezzoforte... Muse Soudns is annoying.

Again, when there are a lot of instruments, it's really hard to tell what's playing what.
Why is a pianissimo piccolo louder than a mezzopiano flute?

The musical score for measures 65-68 is written for a large ensemble. The Piccolo part (Picc.) is marked *pp* and features a melodic line. The Flutes 1-3 (Fl. 1, Fl. 2, Fl. 3) parts are marked with a series of eighth notes. The Clarinet in Bb (Cl. in Bb) part is marked with a series of eighth notes. The Piano (Pno.) part features a melodic line in the right hand and a sustained chord in the left hand. The Violins 1-5 (Vlns. 1, Vlns. 2, Vlns. 3, Vlns. 4, Vlns. 5) parts are marked *mp* and feature sustained chords. The Cello (Cbs.) part is marked with a series of eighth notes.

When I first uploaded this, that high note was
out of tune due to Muse Sounds weirdness.

Why is mezzoforte so much louder than mezzopiano?

rit.

accel.
♩ = 60

The speed of the tempo change isn't perfect, but I'm too lazy to fix it.

I'm not entirely sure the violin plays the entire time, but it definitely does in measures 108-109.

Guessing; can't hear the F after this measure
